

MillTek

Built on Miles of Experience

Engineered to handle heavy-duty milling applications with consistent, reliable performance.

Highlights

- Long Service life
- Zero Bond Failures
- Made in the USA
- Surface Protection

The logo for Stellana, featuring the word "Stellana" in a stylized blue font with a white outline, set against a background of a large yellow construction vehicle (a mill) operating on a road under a cloudy sky. The vehicle is equipped with a large orange MillTek component, which is a rectangular block with four circular holes and two black knobs. The word "MillTek" is printed in white on the orange block, and "Stellana" is printed in white on the side of the block. The background image shows the mill's tracks and the road surface being milled.

Crafted from advanced polymer compounds, our MillTek track pads offer exceptional abrasion resistance and traction for challenging conditions. Engineered for durability in harsh terrain, they deliver reliable, long-lasting performance. Our production process is carefully managed to ensure the highest quality.

*Compatible with all leading brands in the market.
Sizes 10" to 18"*

Typical Uses

Ideal for extreme work environments.
MillTek provides surface protection for:

- Highways
- Concrete
- Asphalt

Performance Strengths

- Durable material options
 - Polyurethane
 - Rubber
- Maximum traction
- Extended work life
- Superior stability and operational efficiency
- Protects equipment and surfaces

What to expect from MillTek by Stellana

Stellana produces Track Pads with the highest standard of craftsmanship. Our products offer the lowest cost of ownership, and the longest work life found in our industry. Our stringent production process ensures that our track pads never debond and remain consistent from pad to pad. Stellana's worldwide production sites, USA, Sri Lanka, Sweden, and China have powered OEM success for decades.
